Education

B.E. in Computer Science & Engineering

RNS Institute of Technology, Bangalore

Graduation: 2028

CGPA: 8.13 / 10

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, SQL

ML & AI: LLMs Fundamentals, MCP, RAG, Vector DBs

Frameworks: React.js, FastAPI

Cloud & Tools: Docker, AWS (S3, Lambda), Arch Linux, Git

Projects

MCP DASH – Testing Tool for MCP Servers | *React.js, TypeScript, Node.js, WebSocket* | Docs

2026

- Built a tool to connect to MCP servers, inspect tools/resources/prompts, and view live traffic in a console-style UI.
- Used IndexedDB to save MCP sessions and call logs so the last session can be restored after refresh.
- Added a traffic panel with cursor-based pagination and replay for previous tool calls.
- Outlined a stdio proxy recorder and a schema change detector for debugging MCP workflows.

Receipts | *TypeScript, Node.js, MCP, Supermemory Local* | Live

2026

- Built a CLI based GitHub memory tool that tracks public statements and project history to detect contradictions and check proposed changes against past maintainer preferences or organization guidelines.
- Made to fix inconsistency in existing codebase and hope to fix any issue or merge any PR with repo official contribution guideline or any specific maintainer guideline.

Sipify Ads Creative | *React, TypeScript, ElevenLabs, MCP, Postman, FastAPI* | Live

2026

- Built the Sipify AI studio interface, improving the UI/UX and integrating key backend workflows for a smoother product experience.
- Developed an MCP server for Sipify to connect with compatible MCP clients and expand integration support.

FindTogether (Prototype) | *React.js, Figma, Node.js, Supabase* | Live

2025

- Built a platform for families to find lost loved ones using similarity scoring to match missing and found-person cases.
- Designed a real-time dashboard and prioritization flow to compare cases by description, location, and time.

Location Price Bangalore | *HTML, CSS, JavaScript, Figma* | Live

2024

- Built a Bangalore real-estate platform that combines project listings with locality-based market insights for property discovery and comparison.

Achievements

- **2nd Place** – Educative 30-Day Coding Challenge (2025); competed in daily DSA and problem solving tasks across 30 days against 1000+ participants.
- **SIH 2025 Internal Round** – Team lead for FindTogether, selected at institute level for Smart India Hackathon 2025.
- **Perplexity AI Campus Partner** – Promoted Perplexity's AI browser and automation tools on campus through events and peer outreach.
